High performance
with a wide range of
solutions and options.

Product description

Thanks to its ergonomic, inclined carriage design the slicer can also be used for heavy products. Fitted with a powerful motor - the energy is used where it's needed: at the blade. The GSP H mainly impresses by its numerous variation and combination options. In addition, the slicer features a Ceraclean® surface which is easy to clean and ensures easy gliding of products over the carriage plate. A highlight of the gravity feed slicer is an optional integrated portion scale. The weight is indicated on a touch display by means of which the blade speed can also be easily controlled.

GSP H 18° (European model)

Highlights

- Hygienically perfect design: disassembly without tools and dishwasher-safe Ceraclean® attachment parts as well as large distance between blade and motor tower for ease of cleaning
- 40° angled blade and carriage inclination of optionally 0°, 18° or 25°
- Closed machine surface without corners and edges
- Targeted transport of juices from meat and the sliced products
- The innovative blade cover is easily and simply mounted by means of an intelligent quick lock system
- Powerful Bizerba motor with innovative performance concept which is suitable for slicing almost any product without any problems.
- Numerous carriage versions are available.
